TITLE: Assistive Devices in Inclusive Classroom

RESOURCE PERSON: Dr. Charu Sethi

DATE: Proposed for February 2023

TIME: 10 am onwards

VENUE: Bala Pritam Auditorium, GNCE

One of the greatest problems the world is facing today is the growing number of persons who are excluded from the meaningful partnership in the economic, social, political and cultural life of their communities.

A session on Assistive Devices in Inclusive Classroom will be organized in the month of February 2023, with the pupil trainees of Batch 2021-23, Semester-4, to make them aware about the need of differently abled persons.

In a democratic country like India, every child has the right to education. All the children should be given an equal opportunity to learn to the limits of their capacities. Inclusive education is a system in which all children from a community learn together in the same local school. It enables the children to participate together in the society from the very beginning. Provision of such form of education inculcates a feeling of confidence and offers them to access the formal system of education. It is important for prospective teachers to understand about the teaching aids and equipment required for the differently able students.
